BANKOLE RIDWAN

Data Analyst | Data Scientist | Gold Fellow at The Room

+2347065866555 ridwanabiolabankole@gmail.com https://bit.ly/BankoleR-Portfolio https://bit.ly/BankoleR-LinkedIn
Osogbo, Nigeria (willing to relocate)

SUMMARY

- Data Scientist and Machine Learning Engineer with 4+ years of experience designing and deploying AI solutions that drive business growth and operational efficiency.
- Adept at building intelligent agents, natural language systems, and predictive models using Python, LangChain, AWS, and deep learning frameworks.
- Recognized Gold Fellow at The Room, ranking in the top 5% of ALX Tech graduates for excellence in data innovation and mentorship.
- Skilled as an AI Educator, guiding learners in ML, NLP, CV, and data engineering through project-based instruction.

EXPERIENCE

AI & Data Science Educator | ML, NLP, CV, GenAI, Data Engineering

Brain Builders IT Firm / 3MTT DeepTech_Ready

05/2024 - Present Osogbo, Nigeria

- Mentored diverse learners through hands-on projects using Python, Scikit-learn, PyTorch, and TensorFlow, guiding them to successfully complete real-world projects and build professional portfolios.
- Coach students to implement and evaluate ML algorithms for classification, regression, clustering, and deep learning framework, fostering a deep understanding of applied AI.
- Teach image processing, feature extraction, object detection, and CNN architectures (ResNet, YOLO, Faster-RCNN) through hands-on, project-based learning.
- Explain NLP curriculum spanning tokenization, embeddings, transformers, and text generation with Hugging Face and spaCy.
- Deliver in-depth instruction on ETL pipelines, data modeling, and cloud integration using SQL, Airflow, Spark, and AWS.
- Guide hands-on projects using Hugging Face, LangChain, and LangGraph to build intelligent assistants and content generation tools.

Data Scientist / Machine Learning Engineer

kenkeputa

12/2024 - Present Remote

- Developed an AI-driven social media agent using Graph API, LangChain, LangGraph, and MCP Server to automatically detect, post, and respond to comments and direct messages, reducing manual monitoring workload across 5 company social media pages and enabling automated email escalation for critical issues.
- Engineered a natural language search system that enables users to find products by expressing queries in their own words, replacing rigid category-based searches and enhancing user experience and engagement.
- Automated the email marketing workflow using Gmail's SMTP and Gemini API—from campaign generation to sending and performance tracking—allowing the marketing team to scale outreach efforts and focus on strategy rather than repetitive operational tasks.
- Implemented an image ranking model using AWS Rekognition to evaluate and prioritize product display images, ensuring that the most relevant images appear first and improving user click-through rates.

TECHNICAL SKILLS

Python | SQL | Computer Vision | Yolo | Ultralytics | Transformer | NLP | Data Engineering | MLOps | AI Agent | Generative AI | Statistics | Regression Analysis | AWS Services | Flask | Scikit | Web Scraping | PyTorch | TensorFlow | PowerBI | Excel

SOFT SKILLS

Team Player | Interpersonal Skills | Integrity | Project Management Skills | Adaptability | Communication | Collaboration

KEY ACCOMPLISHMENTS

Gold Fellow at The Room

Ranking in the top 5% of ALX Tech Graduates, showcasing a commitment to excellence, and honored as a Gold Fellow at The Room. Leveraged exclusive resources for extensive personal and professional growth through mentorship, networking, and skill-focused events.

EDUCATION

Higher Certificate in Data Science

ExploreAI, South Africa

01/2023 - 12/2023

Higher Certificate in Data Analytics

ALX / Udacity

07/2022 - 10/2022

Bachelor of Pharmacy

OAU, Nigeria

2014 - 2019

EXPERIENCE

Data Scientist / Data Science Trainer

OdumareTech

02/2024 - 08/2024 Remote

- Spearheaded research projects solving diverse problems with machine learning, utilizing Python, scikit-learn, NLP, and Streamlit frameworks.
- Mentored and trained aspiring data scientists, fostering proficiency in Excel, SQL, PowerBI, and Python.
- Initiated and oversaw research projects to develop a hate speech detection system utilizing Python, sci-kit-learn, NLP, and Streamlit frameworks.
- Collaborated with management on data-driven strategies to enhance organizational growth and performance.

Intern Data Scientist

ExploreAI

01/2023 - 12/2023 Remote

- Engineered a Python script for web scraping and analysis of customer reviews, generating actionable insights for targeted marketing campaigns.
- Led the development of LLM-based applications, shortening content creation time by 50% using Cuda, Llama-2-70b, and Langchain.
- Collaborated with stakeholders to formulate business strategy and data science approaches, resulting in a 60% increase in project success rates.
- Championed developing and implementing advanced statistical models, utilizing regression analysis to extract actionable insights from complex datasets.
- Presented modeling insights to technical and non-technical stakeholders, fostering collaboration and understanding.
- Developed and maintained over 15 predictive models and machine learning algorithms, achieving a 20% improvement in model accuracy.

Pharmacist Manager

Jufat Pharmacy and Store

01/2020 - 11/2023 Ibadan, Nigeria

- Analyzed prescription refill records using Python, achieving a 67% enhancement in medication adherence and implementing tailored counseling strategies.
- Led demand-forecasting initiatives, preventing stock-outs and reducing sales loss by 50% through effective inventory management.
- Implemented a robust tracking system for outcomes and adverse events, resulting in a 50% increase in patient adherence and overall well-being.
- Collaborated with healthcare teams, providing data-driven insights for targeted interventions.
- Designed health promotion campaigns aligned with community health trends.

PROJECTS

Oral Insulin Clinical Trial

https://bit.ly/Statistical-Testing

- Conducted statistical modeling to examine the dose-response correlation between oral insulin (Auralin) and injectable insulin (Novodra), yielding valuable insights pivotal for designing and implementing a clinical trial focused on oral insulin.
- Utilized Python, Scipy, and Hypothesis testing.

Targeted Marketing Using LLM

https://bit.ly/Targeted-Marketing-Using-LLM

- Built and deployed an LLM-based application for real-time feedback on marketing content alignment, improving lead generation by 20%.
- Utilized Python, HuggingFace, NLP, and Langchain.

PROJECTS

Climate Change Sentiment Classifier

https://bit.ly/Sentiment-Classification

- Developed a classification model predicting user sentiment about climate change based on tweets.
- Utilized NLP, SVM, Decision Tree, Random Forest, and Bayesian Networks.

Renewable Energy Forecast

https://bit.ly/Energy-Forecast

- Collaborated on developing a regression model for predicting load shortfalls, achieving the first position on the Kaggle leaderboard.
- Used Flask, AWS cloud computing, regression algorithms, and Scikit-Learn.

Movie Recommender System

https://bit.ly/Recommender-System

- Built and deployed a recommender system, reducing the time to choose the right movies by 50%.
- Utilized sci-kit learn, AWS EC2, S3 bucket, unsupervised machine learning algorithm and streamlit.

Human Resources Absenteeism

https://bit.ly/Staff-Absenteeism

- Explored Human Resources data to unearth insights and recommendations to end chronic absenteeism.
- Utilized Power BI, Python, and Excel

User Engagement Analysis

https://bit.ly/Engagement-Analysis

- Analyzed a group chat history and provided recommendations to improve communication strategy and elevate user engagement.
- Utilized NLP, Python, Matplotlib, Power BI
